

# Community Assessment Results

## Fairbanks Community Assessment Results

The Community Assessment Toolkit or CAT is a collection of data-recording forms used to evaluate the food and physical activity environments of communities. These enabled us to study some of the determinants of healthy eating, physical activity and obesity among youth. Schools, parks, physical activity facilities and fast food restaurants were surveyed using documents adapted from other surveys.

### Section 1. Assessment of Parks

The Form used to assess parks is modified from the Bridging the Gap Program, University of Illinois at Chicago, Park Observation Form (See Appendix for form used). The purpose of this survey is to improve our understanding of accessibility of park settings and quality of opportunities for physical activity in these settings among CHL communities. A complete list of parks that were located within the community boundary, or on the periphery, and their locations was compiled for each community by local staff. Staff then assessed up to ten parks per community or all of them when there were less than ten parks in a community. Staff were instructed to spend about 30 minutes walking through each park to survey its accessibility, setting, amenities, sports fields (e.g., soccer, football, baseball), courts (e.g., tennis, basketball, volleyball), walking/running/biking trails, and incivilities.

**Eligible parks:** Local municipal or county park that is open to the public

- Has equipment used for physical activity or play, including playing fields and courts AND/OR has green space or natural features, benches, walking paths, picnic tables, or other park features
- On-the-ground parks only. Must also have a sign designating it as a public park if no sports features are present

**Exclusions:** Campgrounds, golf courses, forest preserves, stadiums, zoos, state and national parks, private/resident-only (e.g., neighborhood association) parks, stand-alone fields/courts associated with a school.

**Park Setting, Parking, Sidewalks, and Amenities**

Upon entering the park staff assessed the park setting, parking and sidewalk features, and certain park amenities.

Observations on park setting included whether it was a public park, whether it was adjacent to a school, and whether it shared sports features with a school. In Fairbanks 11 sites were surveyed. Ten (90.9%) of these were public parks. Among the 8 parks with information available, 1 (12.5%) was adjacent to a school. Information was available concerning shared sports features for 7 parks, and none (0.0%) of these parks shared sports features with an adjacent school.

A total of 10 (90.9%) parks had on-site parking, while 7 (70.0%) of parks with information available had on-site parking with overhead lighting. Bicycle parking was available at 3 (30.0%) of the parks for which this information was available. Seven (63.6%) of the 11 parks surveyed had sidewalks leading up to the entrance of the park, and 6 (54.5%) of these sidewalks had overhead lighting.

Observation on park amenities included whether it had closing time signage, restrooms, showers, and beverage vending machines. Among the 11 parks, none (0.0%) had closing time signage, 9 (81.8%) had restrooms, 1 (9.1%) had showers, and none (0%) had beverage vending machines.

### **Park Access and Barriers to Entry**

Staff assessed each park for an entrance fee, signage limiting entry and any physical barriers around the perimeter of the park. Among the 11 parks surveyed in Fairbanks, 10 had responses on the question of whether there was an entrance fee, and one (10.0%) of these did have a fee. Among all 11 parks, 11 (100%) had signage indicating the park name, none had signage stating that public use of the park was limited to specific times, none had signage indicating that the park was private or has restricted

access at all times, and none of the parks had a locked fence or other physical barrier around the perimeter.

**Table S.1.2. Park Access and Barriers (N=11)**

<b>Signage states area is private or restricted access at all times</b>	0	0.0%
<b>Locked fence or other physical barrier around the perimeter prevents public access</b>	0	0.0%

## Sports Features

Staff assessed each park for a specific list of sports features to determine the number of each feature present and whether such a feature had lighting or not. Staff also rated the condition of each feature.

### Feature Descriptions

- **Field, Multi-use:** A multi-use field is a large, flat, open space usable as an athletic field for more than one sport.
- **Field, Football:** A field should have the appropriate layout, markings, and/or equipment in order to be identified as a football field.
- **Field, Baseball:** A field should have the appropriate layout, markings, and/or equipment in order to be identified as a baseball field.
- **Field, Soccer:** A field should have the appropriate layout, markings, and/or equipment in order to be identified as a soccer field.

- **Court, Basketball:** A court should have the appropriate layout, markings, and/or equipment in order to be identified as a basketball court.
- **Court, Tennis:** A court should have the appropriate layout, markings, and/or equipment in order to be identified as a tennis court.
- **Court, Volleyball:** A court should have the appropriate layout, markings, and/or equipment in order to be identified as a volleyball court.
- **Court, Multi-use:** This includes large courts that contain equipment or the capability of holding equipment for different sports such as both basketball and volleyball.
- **Running/Walking Track:** A running/walking track may be located on the perimeter of a field or as part of a track and field stadium. Most tracks will have lane and/or distance markings.
- **Pool:** This includes--
  - a pool that is at least 3 feet deep at the deepest end.
  - a wading pool that is less than 3 feet deep at the deepest end and intended for use by small children.
- **Playground Area:** A playground area includes swings, monkey bars, climbing apparatuses, slides, see-saws, spring features, and other items meant for children's play. In CHL survey, staff was trained to count only the number of areas, not the specific equipment or apparatuses.
- **Skateboarding Facilities:** Skateboarding facilities include ramps, tracks, and other apparatuses meant for use by skateboarders or in-line skaters. In CHL survey, staff was trained to count only the number of rooms or areas, not the specific equipment or apparatuses.
- **Exercise Stations with or without Signage:** Exercise stations are designated activity points. Exercise stations may also be called FitnessTrails or FitTrails.

- **Rock Climbing Wall:** A rock climbing wall is a natural or artificially constructed outdoor wall with grips for hands and feet, used for climbing.

### **Condition of the Feature**

Staff rated the condition and the presence of lighting for each feature item. The condition of a feature could be recorded as “poor”, “okay/good”, or “not rated”. When there was more than one item per feature, each item was evaluated for condition while the presence of lighting was assessed across all items in a feature. For example, if a park had 3 basketball courts and 2 were in okay condition, 1 was in poor condition, and 1 of them had lighting, then the staff would record the number of basketball courts as 3, 2 of which are rated okay/good, 1 rated as poor, and that this park had lighting for this feature.

Feature condition was rated based on the feature’s surface and related equipment, if any was available for the feature. Ultimately the feature condition rating was related to whether or not players could safely play or engage in physical activity on a feature without risking injury or falling. Staff took into consideration the type of activities that would take place on or within a particular feature as well as the material comprising the surface when considering its condition. When assessing the condition of equipment used for physical activity, staff took into consideration age, functionality, wear and tear, damage such as dents or sharp edges, missing pieces, and rust. For example, if a playing surface was composed of concrete, staff assessed whether smooth concrete covered the entire surface and looked for cracks or uneven slabs in the concrete surface.

### **Survey Results for Sports Features**

Across the eleven parks surveyed in Fairbanks, there were a total of 25 features, of which 12 were rated as ok/good, and 13 were not rated.

Playgrounds were the most frequent features (11), followed by multiuse fields (4) and baseball fields (3). Playgrounds may be of particular interests to families with young children. In Fairbanks, 9 of the 11 playgrounds were rated ok/good while 2 were rated poor, and four had lighting. The following table (Table S.1.3) summarizes the number of each sports feature, the conditions of the feature, and whether lighting was present for the feature across all 11 parks in Fairbanks.

**Table S.1.3. Sports features across all 11 parks in Fairbanks**

## Park Features and Amenities

Staff assessed each park for a specific list of features and amenities to determine if the feature or amenity was present and to rate the condition of the surface or feature.

When staff were unable to determine the condition of one or more features of a specific type (if more than one present), they rated the features of that type that could be rated. When any features of a specific type could not be rated due to construction/ repairs or seasonal closure staff selected not rated.

### Feature or Amenity Descriptions

- **Green Space:** This includes natural or landscaped space not specifically designated for physical activity
- **Beaches:** This includes natural or man-made beaches on the edge of water features such as lakes, rivers, and lagoons, as well as beaches at coastal parks.
- **Beaches Swimmable:** This includes any beach area with minimal shore break for a 3-5 year old to swim in.
- **Beaches Recreational:** This includes any beach with facilities for family picnics, barbecues, sports, water-sports, etc.
- **Beaches with Lifeguard:** This may be a swimmable beach, recreational beach, or both wherein lifeguards are present to monitor activities and to alert families of changing currents.
- **Other Water Features:** This includes natural or man-made bodies of water that may be present, including streams, creeks, rivers, ponds, lakes, lagoons, and in case of coastal parks, ocean.
- **Shelters:** This refers to a permanent structure with a roof to protect users from rain or sun. Walls are not required. Cloth or lattice canopies over picnic tables or exercise equipment and pergolas are not included.

- **Picnic Tables, Shaded:** This refers to a table top with benches, including outdoor lunch tables. Shade can be provided by tree or a structure.
- **Picnic Tables, not Shaded:** This refers to a table top with benches including outdoor lunch tables. These include tables without trees or a structure.
- **Benches:** Benches are structures designed to function as seating. These do not include picnic tables or retaining/supporting/landscaped walls whose primary function is not seating.
- **Drinking Fountains:** These include freestanding or attached water dispensers intended for drinking.
- **Decorative Water Fountains:** These include ornamental structures from which jet(s) or stream(s) of water is issued and reflecting pools. Decorative fountains are not used for drinking or swimming.
- **Trash Containers:** These are receptacles for litter and refuse that can be made of metal, plastic, or paper/plastic bags. They may be stand-alone or attached to a building.
- **Grills/Fire Pits:** These are structures designed for cooking meats or other foods over open fire. A fire pit may be built directly into the ground or may be a wide and low metal container that holds coals or wood.
- **Fence:** Large areas of the park are enclosed by a fence.
- **Trails:** These include paved or unpaved pathways or footpaths for walking, biking, roller-skating, etc. Trails are distinct from running/walking tracks in that they tend not follow a strict oval shape, but will usually follow an irregular direction and cover a greater distance than a track.

## Survey Results of Park Features and Amenities

Among the 11 parks in Fairbanks, there were a total of 75 features and amenities, of which 38 were rated as ok/good and 37 were not rated. Among rated features and amenities, all (100%) were rated as ok/good. The most common features and amenities

present were green space (11) and shelters (10). Table S.1.4. summarizes the total number and condition of the assessed features/amenities.

**Table S.1.4. Park features and amenities across all 11 parks in Fairbanks**

## Incivilities

Staff assessed each park for a list of incivilities and how much each was present. The term incivility is used to describe items in the environment that might discourage physical activity. These items are often signs of area deprivation or markers of blight. The following items in this section were used to assess the physical disorder of the park grounds environment.

- **Garbage/Litter:** Includes paper, packaging, and other items of refuse not included in other categories below.
- **Broken Glass:** Includes any types of broken glass, such as bottles, etc.
- **Graffiti/Tagging:** Refers to “unapproved” writing such as painted or drawn signs or symbols (e.g., gang insignia) on the building and/or exterior property. Do not include painted murals or public art.
- **Evidence of Alcohol Use:** This includes beer or other alcohol-related bottles, cans or caps littering the ground or in/around overflowing trash cans. Trash cans were not checked inside for evidence of alcohol use.
- **Evidence of Substance Abuse:** This includes syringes, baggies, rolling papers, etc.
- **Sex Paraphernalia:** This includes condoms, condom wrappers, or other contraceptive device/material, or visible pornographic reading material.
- **Dog Refuse:** There is dog refuse visible.
- **Dogs Unattended:** There are dogs who wander the facility without supervision
- **Vandalism:** There are broken windows or other broken features.

Staff looked for incivilities throughout the park and assigned a score for each incivility type based upon the amount that was present across the park settings. The possible ratings were: none (0), a little (1), some (2), and 3 (a

lot). For the community, average rating for each of the item was used. Mean rating across all 9 items were then used as an overall rating of incivilities across all parks surveyed in that community.

Among the 11 parks in Fairbanks, there was evidence of broken glass (a little) and graffiti (a little). There was no evidence of any of the other types of incivilities surveyed, however the presence of snow at the time of the surveys may have obscured some incivilities. (Table S.1.5).

**Table S.1.5. Average Amount of Each Incivility across 11 parks in Fairbanks**

<b>Incivility Type</b>	<b>Amount</b>
<b>Garbage</b>	None
<b>Broken glass</b>	A little
<b>Graffiti/Tagging</b>	A little
<b>Evidence of Alcohol use</b>	None
<b>Evidence of Substance Abuse</b>	None
<b>Sex Paraphernalia</b>	None
<b>Dog Refuse</b>	None
<b>Dogs Unattended</b>	None
<b>Vandalism</b>	None

## **Section 2. Assessment of Schools**

Method: The tool used to assess schools is modified from the Bridging the Gap Program, University of Illinois at Chicago, School Observation Form (See APPENDIX for form used. Some amenities listed on the form were not surveyed at the Fairbanks schools.). The purpose of this survey is to improve our understanding of the availability and quality of physical activity features that are located on school grounds in CHL communities. A complete list of schools that were located within the community boundary, or on the periphery, and their locations was compiled for each community by local staff. Staff then assessed up to ten schools per community or assessed all of them when there were fewer than ten schools in a community. Staff were instructed to spend about 30 minutes walking through each school grounds to survey its accessibility, setting, amenities, sports fields (e.g., soccer, football, baseball), courts (e.g., tennis, basketball, volleyball), other features (e.g. track, pool, and playground) and incivilities.

**Eligible schools:** All school grounds were eligible for assessment. This includes schools sharing some sports features with an adjacent park.

### **School Setting, Parking, Sidewalks, and Amenities**

Method: Upon entering the school, staff assessed some aspects of the school setting, parking and sidewalk features.

Observations on school setting included whether it was adjacent to a park. In Fairbanks 11 sites were surveyed, including 1 Daycare facility, and 1 Head Start facility. Among the 11 sites, 3 had information on whether the school was adjacent to a park. Out of those 3 schools, 0 (0%) were adjacent to a park.

All schools had on-site parking with overhead lighting, and 8 (72.7 %) had bicycle parking. Six (54.6 %) of the schools had a sidewalk leading up to the entrance of the school, and in all 6 cases, the sidewalks had overhead lighting.

**Table S.2.1. School Setting**

School Setting	Number	Percent
<b>Setting (n=3)</b>		
Adjacent to a park	0	0.0%
Shares sports features with a park	0	0.0%
<b>Parking (n=11)</b>		
Parking on-site available (not including street parking)	11	100.0%
Parking has lights	11	100.0%
Bicycle parking racks or cages available	8	72.7%
<b>Sidewalk (n=11)</b>		
Sidewalks on street lead up to the entrance	6	54.6%
Sidewalks have lighting	6	54.6%

### School Access and Barriers to Entry

Staff assessed each school for signage limiting entry and any physical barriers around the perimeter of the school. Among the eleven schools surveyed in Fairbanks, 11 (100%) had signage indicating the school name, none had signage stating that public use of the school was limited to specific times (e.g. after school), none had signage indicating that the school was private or had restricted access at all times (e.g. no trespassing, school use only), and none of the schools had a locked fence or other physical barrier around the perimeter.

**Table S.2.2. School Access and Barriers (N=11)**

<b>Access and barriers</b>		
<b>Signage indicates school name</b>	11	100.0%
<b>Signage states public use of area is limited to specific times</b>	0	0.0%
<b>Signage states area is private or restricted access at all times</b>	0	0.0%
<b>Locked fence or other physical barrier around the perimeter prevents public access</b>	0	0.0%

### **Sports Features**

Staff assessed each school for a specific list of sports features to determine the number of each feature present and whether such a feature had lighting or not. Staff also rated the condition of each feature. These features are the same as those included in the assessment of parks.

### **Condition of the Feature**

Staff rated the condition and the presence of lighting for each feature item. The condition of a feature could be recorded as “poor”, “okay/good”, or “not rated”. When there was more than one of a particular feature, each was evaluated for condition while the presence of lighting was assessed across all features. For example, if a school had 3 basketball courts and 2 were in okay condition, 1 was in poor condition, and 1 of them had lighting, then the staff would record the number of basketball courts as 3, 2 of which were rated okay/good, 1 was rated as poor, and that this school had lighting for this feature.

Feature condition was rated based on the feature’s surface and related equipment, if any was available for the feature. Ultimately the feature condition rating was related to whether or not players could safely play or engage in physical activity on a feature without risking injury or falling. Staff took into consideration the type of activities that would take place on or within a particular feature as well as the material comprising the surface when considering its condition. When assessing the condition of equipment used for physical activity, staff took into consideration age, functionality, wear and tear, damage such as dents or sharp edges, missing pieces, and rust. For example, if a playing surface was composed of concrete, staff assessed whether smooth concrete covered the entire surface and looked for cracks or uneven slabs in the concrete surface.

### Survey Results for Sports Features

Across the eleven schools surveyed in Fairbanks, there were a total of 37 sports features, of which 10 were rated as ok/good, and 27 were not rated.

Playgrounds and multiuse fields were the most frequent features (9 each), followed by basketball courts (7), baseball fields (3), football fields (3), and running/walking tracks (3). Playgrounds may be of particular interest to families with young children. Among the 9 playgrounds in Fairbanks, 6 were rated ok/good while 3 were not rated. Seven schools had a playground area with lighting. The following table (Table S.2.3) summarizes the number of each sports feature, the condition of the feature, and whether lighting was present for the feature across all 11 schools in Fairbanks.

**Table S.2.3. Sports features across all 11 schools in Fairbanks**

Feature	Total number of the feature	Condition of the Feature			Number of features w/ Lighting
		OK/Good	Poor	Not rated

<b>Skateboarding</b>	1	1	0	0	1
<b>Exercise Stations</b>	0	0	0	0	0
<b>Rock Climbing</b>	0	0	0	0	0

### **School Features and Amenities**

Method: Staff assessed each school for a specific list of features and amenities to determine if the feature or amenity was present and to rate the condition of the surface or feature. These features are the same as those included in the assessment of parks.

When staff were unable to determine the condition of one or more features of a specific type (if more than one present), they rated the features of that type that could be rated. When any features of a specific type could not be rated due to construction/ repairs or seasonal closure staff selected not rated.

## Survey Results of School Features and Amenities

Among the 11 schools in Fairbanks, there were a total of 45 features and amenities, of which 30 were rated as ok/good, and 15 were not rated. The most common features and amenities present were fences (10), trash bins (9), benches (8), and green space (8). The number and condition of features and amenities assessed is shown in Table S.2.4

**Table S.2.4. Features and amenities across all 11 schools in Fairbanks**

Feature	Total Number of the feature	Condition of the Feature

These items are often signs of area deprivation or markers of blight. The items surveyed were used to assess the physical disorder of the school grounds environment. These incivilities are the same as those included in the assessment of parks.

### **Amount of Incivilities**

Staff looked for incivilities throughout the school and assigned a score for each of 9 incivility types based upon the amount that was present across the school setting. The possible ratings were: none (0), a little (1), some (2), and 3 (a lot). For the community, the average rating for each item was used.

Among the eleven schools in Fairbanks, there was A Little evidence of graffiti, and no evidence of any of the other types of incivilities surveyed. (Table S.2.5). However, surveys were conducted during winter when there was some snow present, which may have obscured some evidence of incivilities.

### **Section 3. Assessment of Physical Activity Facilities**

Method: The tool used to assess physical activity (PA) facilities is modified from the Bridging the Gap Program, University of Illinois at Chicago, PA Facility Observation Form (See APPENDIX for form used). The purpose of this survey is to improve our understanding of the availability and quality of physical activity features that are located on PA facility grounds in CHL communities. A complete list of PA facilities that were located within the community boundary, or on the periphery, and their locations was compiled for each community by local staff. Staff then assessed up to ten PA facilities per community or assessed all of them when there were fewer than ten PA facilities in a community. Staff were instructed to spend about 30 minutes walking through each PA facility grounds to survey its setting, amenities, sports fields (e.g., soccer, football, baseball), courts (e.g., tennis, basketball, volleyball), other features (e.g. track, pool, and playground) and incivilities.

**Eligible PA facilities:**

Observations in PA facilities included for-profit and non-profit facilities. Examples of non-profit PA facilities are public community recreation centers, YMCA/YWCAs, and Boys and Girls Clubs (BGCs). For-profit PA facilities include gyms, health clubs, and other physical-activity related businesses that allow patrons to come in and use equipment or other facilities (e.g., courts, gymnasiums), usually for a recurring fee or membership schedule.

In Fairbanks, ten facilities were surveyed.

**PA facility Setting and Fees**

Upon entering the PA facility, staff assessed the PA facility setting and fees.

Observations on PA facility setting included facility type, the presence of indoor and outdoor sports features, childcare and teen services, and types of fees. Among the 10 PA facilities surveyed in Fairbanks, 4 (40.0%) were community recreation centers, 1 (10.0%) was a Boys and Girls Club, 3 (30.0%) were For-Profit PA facilities, and 2 (20.0%) were other. Four (50.0%) of the facilities for which information was available had indoor sports features only, while 4 (50.0%) had both indoor and outdoor sports features. One (10.0%) facility had childcare available, and two (20.0%) offered teen services. Nine (90.0%) facilities had daily fees, while 8 (80.0%) offered low-income discounts, and 8 (80.0%) offered youth discounts. Table S.3.1 summarizes this information.

**Table S.3.1. PA facility Setting (N=10 unless otherwise noted)**

<b>Fee discount for low-income</b>	8	80.0%
<b>Fee discount for youth</b>	8	80.0%

### **PA facility Parking, Sidewalks and Amenities**

Staff assessed each PA facility for on-site parking, parking overhead lighting, bicycle parking, a sidewalk leading up to the entrance, and sidewalk overhead lighting. Among the ten PA facilities surveyed in Fairbanks, all (100.0%) had on-site parking with

overhead lighting, and 9 (90.0 %) had bicycle parking. Nine (90.0%) had a sidewalk leading up to the entrance, and 9 (90.0%) had sidewalk overhead lighting.

Observations on PA facility amenities included whether it had restrooms, showers, and beverage vending machines both inside and outside. Among the 10 PA facilities, all (100.0%) had restrooms inside. Nine (90.0%) had showers and 7 (70.0 %) had beverage vending machines present inside. Information on outside amenities was available for 3 facilities. One (33.3%) had outdoor restrooms, and none had outdoor showers. None of the facilities for which information was available had outdoor beverage vending machines. Table S.3.2 summarizes this information.

**Sports Features**

Staff assessed each PA facility for a specific list of sports features indoors and outdoors to determine the number of each feature present, the condition of each feature, and, for outdoor features, whether lighting was present. Staff also rated the condition of each feature.

**Condition of the Feature**

Staff rated the condition for each feature item and, for outside features, the presence of lighting. The condition of a feature could be recorded as “poor”, “okay/good”, or “not rated”. When there was more than one of a particular feature, each was evaluated for condition while the presence of lighting was assessed across all features. For example, if a PA facility had 3 basketball courts and 2 were in okay condition, 1 was in poor condition, and 1 of them had lighting, then the staff would record the number of basketball courts as 3, 2 of which were rated okay/good, 1 was rated as poor, and that this PA facility had lighting for this feature.

Feature condition was rated based on the feature’s surface and related equipment, if any was available for the feature. Ultimately the feature condition rating was related to

whether or not players could safely play or engage in physical activity on a feature without risking injury or falling. Staff took into consideration the type of activities that would take place on or within a particular feature as well as the material comprising the surface when considering its condition. When assessing the condition of equipment used for physical activity, staff took into consideration age, functionality, wear and tear, damage such as dents or sharp edges, missing pieces, and rust. For example, if a playing surface was composed of concrete, staff assessed whether smooth concrete covered the entire surface and looked for cracks or uneven slabs in the concrete surface.

### Survey Results for Indoor Sports Features

Across the ten PA facilities surveyed in Fairbanks, there were a total of 45 indoor sports features, of which 42 were rated as ok/good, and 3 were not rated.

Exercise machine areas were the most common feature (11), followed by multipurpose rooms (9), and pools (5). The following table (Table S.3.3) summarizes the number of each sports feature and the condition of the feature across all 10 PA facilities in Fairbanks.

**Table S.3.3. Indoor sports features across 10 PA facilities in Fairbanks**

### Survey Results for Outdoor Sports Features

Across the ten PA facilities surveyed in Fairbanks, there were a total of 12 outdoor sports features, of which 1 was rated as ok/good and 11 were not rated. Five of the facilities had lighting on outdoor features.

The most common features were tennis courts (6), followed by soccer fields (2). The following table (Table S.3.4) summarizes the number of each sports feature and the condition of the feature across all 10 PA facilities in Fairbanks.

**Table S.3.4. Outdoor sports features across all 10 PA facilities in Fairbanks**

### **PA facility Amenities**

Method: Staff assessed each PA facility for a specific list of amenities to determine if the amenity was present and to rate the condition of the item.

When staff were unable to determine the condition of one or more features of a specific type (if more than one present), they rated the features of that type that were able to be rated. When any features of a specific type could not be rated due to construction/repairs or seasonal closure, staff selected not rated

Among the 10 PA facilities in Fairbanks, there were a total of 13 amenities, of which 10 (76.9 %) were rated as ok/good, and 3 were not rated. The amenities present were

drinking fountains (10), trash containers (2), and benches (1). Table S.3.5 summarizes the total number and condition of each individual feature/amenity which was assessed.

**Table S.3.5. Amenities across all 10 PA facilities in Fairbanks**

Feature	Total Number of the feature	Condition of the Feature		
		OK/Good	Poor	Not rated
Drinking fountain indoor	10	9	0	1
Drinking fountain outdoor	0	0	0	0
Trash container	2	1	0	1
Benches	1	0	0	1

### Incivilities

Method: Staff assessed each PA facility for a list of incivilities and how much each was present. The term incivility is used to describe items in the environment that might discourage physical activity. These items are often signs of area deprivation or markers of blight.

These incivilities are the same as those included in the assessment of parks. Staff looked for incivilities throughout the PA facility and assigned a score for each of 9 incivility types based upon the amount that was present across the PA facility ground. The possible ratings were: none (0), a little (1), some (2), and 3 (a lot). For the community, an average rating for each item was used.

Among the ten PA facilities in Fairbanks, the mean rating across all the incivility types was 0.01. There was a little bit of garbage, and no evidence of any of the other incivilities assessed. However the presence of some snow at

four of the sites may have obscured some evidence of incivilities.(Table S.3.6).

**Table S.3.6. Average Amount of Each Incivility across 10 PA facilities in Fairbanks**

#### **Section 4. Assessment of Fast Food Outlets**

Method: The tool used by CHL to assess fast food outlets (FFO) is modified from the Bridging the Gap Program (BTG), University of Illinois at Chicago. The BTG-COMP Fast Food Observation Form was designed to assess a variety of attributes in the fast food outlet environment, including advertising and marketing, availability of nutritional information and healthy options, availability and pricing of specific food and beverage items, as well as other characteristics of the facility. (See APPENDIX for CHL form

used.) The purpose of this data collection is to characterize the away-from-home food environment, with a focus on fast-food outlets and pizzerias, which are often popular destinations for youth.

### **Eligible Fast Food Outlets:**

Any national and regional fast food chains or franchises and independent fast food outlets that were located within Fairbanks were eligible. Fast food outlets are most often characterized by the fact that customers order and pay at the counter prior to eating. Data collection was also conducted in pizzerias, which may have table service. Specialty snack/drink shops where 50% or more of the menu items are a snack or drink item (e.g. Dunkin' Donuts, Starbucks, Baskin Robbins, Auntie Anne's Pretzels, Tropical Smoothie Café), buffets, and "take & bake" pizza places (e.g. Papa Murphy's, Homemade Pizza Co.) were excluded.

Ten fast food outlets in Fairbanks were included in this analysis.

### **Outlet Type and Shared Space**

Upon entering the outlet, staff assessed the outlet type according to the main cuisine or type of food/beverages on the menu board and whether it shared space with another business.

The outlet type was selected from a list, or other could be selected. Among the 10 Fairbanks fast food outlets, 4 (40.0%) were Burger and Fries outlets, 2 (20.0%) were Mexican/Latin American outlets, 2 (20.0%) were Sandwich or Sub Shops, 1 (10.0%) was a Fried Chicken/Fried Fish outlet, and 1 (10.0%) was a Chinese/Pan-Asian outlet.

Each outlet was assessed for whether it had its own building /exterior or whether it shared spaced with a food court, grocery store, gas station, or other restaurant. Two (20.0%) of the 10 fast food outlets in Fairbanks shared space with a grocery store. Information on space shared with gas stations, other restaurants or food courts was available for 9 of the Fairbanks outlets. Table S.4.1 summarizes this information.

**Table S.4.1. Outlet Type and Shared Space (N=10)**

## Outlet Parking, Sidewalks, and Exterior Amenities

Staff assessed each outlet for certain amenities such as on-site parking, bicycle parking, parking overhead lighting, sidewalks, and sidewalk overhead lighting.

Among the 10 fast food outlets surveyed in Fairbanks, 7 (70.0%) had on-site parking with overhead lighting, and 1 (10.0%) had bicycle parking. Seven (70.0%) had a sidewalk leading up to the entrance and all of these had sidewalk lighting.

Observations on outlet amenities included whether it had outdoor seating, bars on the windows, an exterior play area, an indoor play area visible from the outside, and a drive-through window. Among the 10 outlets in Fairbanks, none had outdoor seating, bars on the windows, or an exterior play area. One (10.0%) had an indoor play area visible from the outside, and 6 (60.0%) had a drive-thru window. This information is summarized in Table S.4.2.

**Table S.4.2. Parking, Sidewalks, and Exterior Amenities (N=10)**

Exterior Feature	Number	Percent
<b>Parking</b>		
<b>Parking on-site available (not including street parking)</b>	7	70.0%

<b>Exterior play area</b>	0	0.0%
<b>Indoor play area visible from outside</b>	1	10.0%
<b>Drive through window</b>	6	60.0%

Staff also assessed the number of external walls visible from the street and the level of graffiti and garbage that was present. Three (30.0%) of the Fairbanks outlets had one visible wall, 4 (40.0%) had three visible walls, and 3 (30.0%) had four visible walls. This question was intended to give a sense of the size/layout of the restaurant property and the number of sides on which advertisements can be placed.

Staff rated each fast food outlet as having none, a little, some, or a lot of graffiti and garbage. Among the Fairbanks outlets, 6 (60.0%) had no graffiti present and 4 (40.0%) had a little graffiti. One (10.0%) had a little garbage, and 9 (90.0%) had none. This information is summarized in Table S.4.3.

## Exterior Marketing

Staff assessed food and beverage advertisements on the building exterior and property, child-targeted marketing on the exterior, and other ad themes.

### Ads on the Building Exterior or Property

The number of advertisements at least 8½ x 11 inches in size that were posted on the building exterior and restaurant property was recorded. To be counted, ads must have been visible from the parking lot(s) and/or from the street(s) bordering the restaurant. Ads which could be considered a price promotion, food ad, beverage ad, or soda ad were separately tallied.

- **Exterior ads:** included those that are on the walls, doors, windows or roof of the building and visible from the parking lot(s) or street(s) bordering the restaurant.

- **Property ads:** include those that are not posted on the building, but are in some other place on the restaurant property such as on a fence, light post, pole, garbage can, parking barrier, play area, or other place. Again, these must be visible from the parking lot(s) or street(s) bordering the restaurant.
- **Price promotion ads** have a price specified or the presence of any of the following word(s): “price,” “sale,” “deal,” “save,” “discount,” or “value.” It also includes any ad promoting a multi- item discount like “Buy one, get one free,” “free with purchase,” “try one free” or related language. It may or may not also have included a food or beverage.
- **Food ads** have an image of and/or a name/description for a food item(s). It may or may not also have included a beverage.
- **Beverage ads** have an image of and/or a name/description for a beverage item(s). This could include, for example, soda, coffee drinks, tea, milkshakes, smoothies, juice, water and other beverages.
- **Soda ads:** have an image of and/or a name/description for a soda. This can include bottled or canned soft drinks, as well as fountain drinks.

All 10 fast food outlets in Fairbanks were assessed for ads on the building exterior. Among the 10 outlets, there were a total of 28 ads, 5 ads for price promotion, 27 food ads, 7 beverage ads, and 5 soda ads. The mean and standard deviation (sd) for the number of ads on the building exterior of fast food outlets in Fairbanks is 2.8 (sd=4.0, min=0, max=12). The mean number of ads for a price promotion is 0.5 (sd=0.8, min=0, max=2). The mean number of ads for food is 2.7 (sd=4.1, min=0, max=12). The mean number of ads for beverages is 0.7 (sd=1.3, min=0, max=3). Table S.4.4 summarizes this information. The presence of specific types of ads at each outlet is presented in table S.4.5. The type of ad most commonly observed at FFOs in Fairbanks was a food ad (n=6, 60%), followed by beverage ads (n=3, 30%), price promo ads (n=3, 30%), and soda ads (n=3, 30%).

Among the 10 fast food outlets in Fairbanks, none of the outlets had ads on the property, other than those on the building.

Property	10	0	0	0	0	0

**Other Ads on the Exterior**

Staff also assessed the presence of ads on the outlet’s exterior that included a dollar menu promotion, health claim, cartoon character(s), a celebrity, kids’ meal toy, or other child-directed marketing. Any one ad can be coded as having one or more of the characteristics described above. For example, the same ad could feature both cartoon characters and the kids’ meal toy.

Among the 10 outlets surveyed in Fairbanks, none had dollar menu ads, cartoon ads, celebrity ads, kids’ meal toy ads, health ads or other child-directed marketing on the building exterior. Table S.4.5 summarizes this information.

### **Counter Service and Restaurant Interior**

Staff assessed items describing the type of service offered within the establishment, characteristics of the checkout area, characteristics of the restaurant interior, and availability of self-service beverages and a salad bar.

None of the fast food outlets in Fairbanks were a drive-in only restaurant, so they were all assessed for restaurant interior characteristics. Among the 10 outlets, food was ordered, picked up, and paid for at the counter in 9 (90.0%) of the outlets. Staff counted the number of cash registers inside of the restaurant. This information was available for 6 of the fast food outlets. Three (50.0%) had one register and 3 (50.0%) had two registers. None of the outlets had a glass or Plexiglas divider between customers and a cash register in the restaurant interior.

Regarding other interior characteristics, all 10 (100.0%) of the fast food outlets had indoor seating and restrooms available to customers. Three (30.0%) had a toy display, and two of these were 3 and a half feet or less from the ground (at eye level of children). Regarding specific food and beverage items, 5 (50.0%) outlets had sweets, such as cookies and candy, near the cash register, 7 (70.0%) had self-serve fountain drinks, 1 (10.0%) had free water, and none had self-serve salads. One (10.0%) had an interior play area.

**General Menu: Dollar Menu Items, Combo Meals, Salad, Fruits and Vegetables, and Signs for Health Options**

Staff assessed the availability of a dollar menu and specific items on it, combo meals, salads and other fruit and vegetable sides. Signage for “healthy” items on the menu was also assessed.

Among the 10 fast food outlets in Fairbanks, 1 (10.0%) had a dollar menu, with fruit, dessert, a drink, fries, and entrée each on the dollar menu. Six outlets had information on the availability of a combo meal, and 5 (83.3%) of these offered one. Eight (80.0 %) outlets offered a salad entree, and 6 (60.0%) offered low-fat salad dressing.

Staff tallied the number of side items on the menu that were vegetables, fresh fruit, or other fruit besides fresh fruit. Staff looked for the availability of any side salad(s) or other vegetable(s) listed on the menu as a “side” or “extra” and assessed whether it met the criteria of being non-fried and not having added fat. Vegetables that were part of a main dish were not counted. Staffed looked for the availability of any fresh fruit listed on the menu as a “side” or “extra.” Beverages such as juice or smoothies were not counted. Staff also looked for the availability canned, dried, or other processed (not fresh) fruit options listed on the menu as a “side” or “extra.”

Among the 10 fast food outlets in Fairbanks, there were a total of 2 with vegetable options, 3 offering fresh fruit, and zero other fruit options. Across the 10 outlets, 2 (20.0%) had 1-2 vegetable items, 3 (30.0%) had 1-2 fresh fruit items, and none offered other fruit items.

Staff looked for signage indicating food as low calorie, low fat, low sodium, or healthy. Among the 10 fast food outlets in Fairbanks, none had signage for low calorie, low sodium, or healthy food items. One (10.0%) had signage for low fat food items. One (10.0%) of these fast food outlets had liquor on the menu. This information is summarized in Table S.4.7.

### **Beverage Item Assessment**

Staff assessed the posted menu board for the availability and price of specific beverage items--such as soda, juice, milk, water, coffee, and shakes--commonly found in fast food establishments. A total of 10 fast food outlets in Fairbanks had information on beverage items, except for the assessment of packaged soda and flavored milk, which was only collected in 9 outlets. This information is presented in Table S.4.8.

**Table S.4.8 Beverage Items (N=10 unless otherwise noted)**

### Food Item Assessment

Staff assessed the posted menu board for the availability and price for specific food items commonly found in fast food establishments and pizzerias. Among the 10 fast food outlets in Fairbanks, the most commonly available food item from the list of specific foods was entrée salad with chicken ( 80.0%) followed by French fries, cheeseburger, and chicken sandwiches. This information is presented in Table S.4.9.

### **Children’s Menu Assessment**

Staff assessed each outlet for items that were available and promoted to children (usually ages 12 and under), via the establishment’s kids’ meal or kids’ menu. Staff looked for healthy beverage and food options and asked for these items when they were not posted on the menu board. Staff also assessed the availability of toys.

Among the 10 fast food outlets in Fairbanks, 7 (70.0%) had a kids’ menu or meal available. Three (30.0%) had an unflavored skim/1% milk, 100% juice, or bottled water option on the board, and a fruit, vegetable (only non-fried vegetables w/o added fat), salad or yogurt option on the board. Three (30.0%) outlets offered a free toy with the kids’ meal, and one (10.0%) offered a toy for an additional charge. This information is summarized in Table S.4.10.
